## STERILIZATION AND HEALTHCARE EFFORTS

### Sterilization project in Ternopil, Ukraine

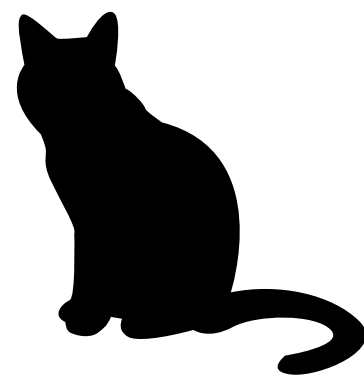

August - September

Initial goal  
**30 animals**

**20 more animals**

**Total cost 13,200 SEK  
(51,000 UAH)**

13,200 SEK / 50 animals =  
**264 SEK per animal**

Initially, we secured an agreement to sterilize 30 animals as part of our initiative in Ternopil. However, **due to the overwhelming number of requests and the evident need in the region, we decided to increase the number of animals to 50.**

## STERILIZATION AND HEALTHCARE EFFORTS

### **Sterilization Project in Kryvyi Rih, Ukraine**

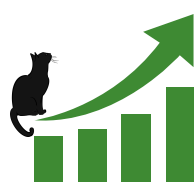

Our next major initiative is a sterilization campaign in Kryvyi Rih.

We are currently in the planning phase, and we expect to ***begin the sterilization of 25 animals*** in the ***coming months***.

This project aims to curb the overpopulation of stray animals, improving both animal welfare and public health.

### **Why is this so important?**

Each sterilized animal means fewer kittens and puppies born to life on the streets, and controlling the stray population is our responsibility to society.
